

OBSERVATION RECORD

Sgr 10

OBJECT

Date: 8/20/01
Time Started: 8:47 PM CDT
Time Finished: 9:10 PM CDT
Transparency: 4.0
Seeing: 4.0

Common Name: _____

M#: 23

NGC #: 6494

Telescope: 12.5" Dob
Eyepiece: 40mm plössl
Filter: -
Magnification: 122x

Type: OC

Magnitude: 5.5

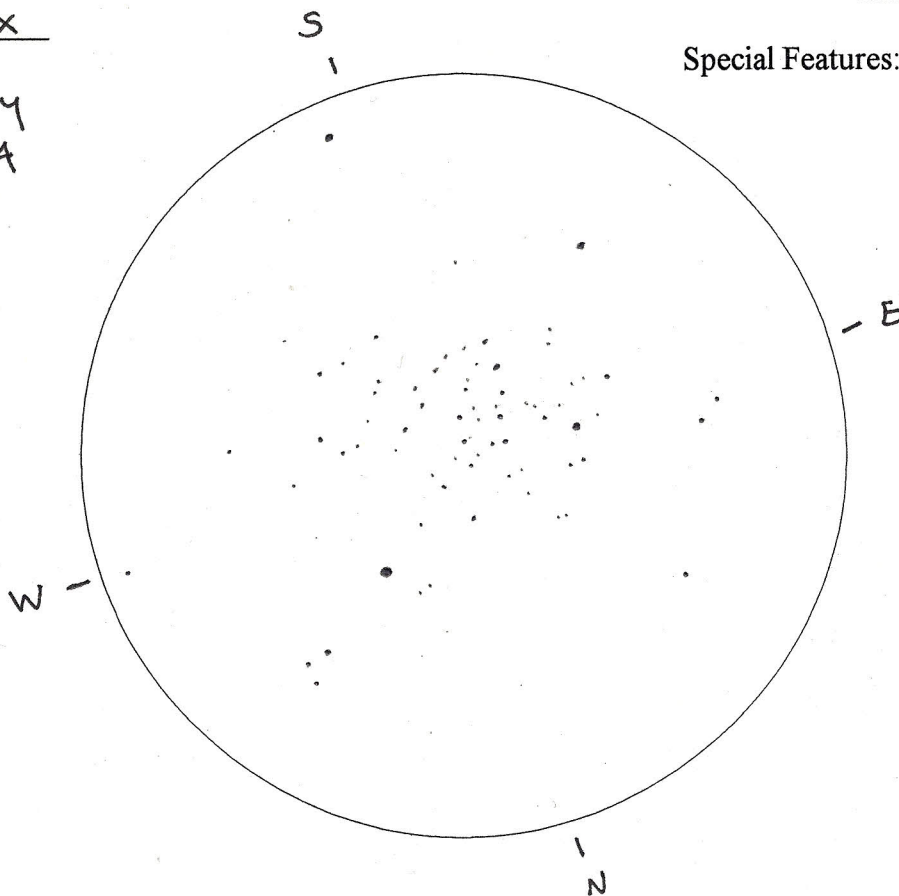

Size: 27'

Coordinates: 17h 56.8m -19° 01'

Special Features: Dist: 2100 l.y.

~150 stars

Discovered by
Messier, 1764

Locating
Sketch:

Sagittarius

○ M23

Description and Field Notes: Beautiful "swarm" of stars in a large cluster. Several strings giving the general impression of some kind of flying insect. A bright star to the northwest marks the "tail".
