

OBSERVATION RECORD

Sgr 12

OBJECT

Date: 8/21/01  
Time Started: 8:45 PM CDT  
Time Finished: 9:15 PM CDT  
Transparency: 3.0  
Seeing: 4.5

Common Name: \_\_\_\_\_  
M#: 28  
NGC #: 6626

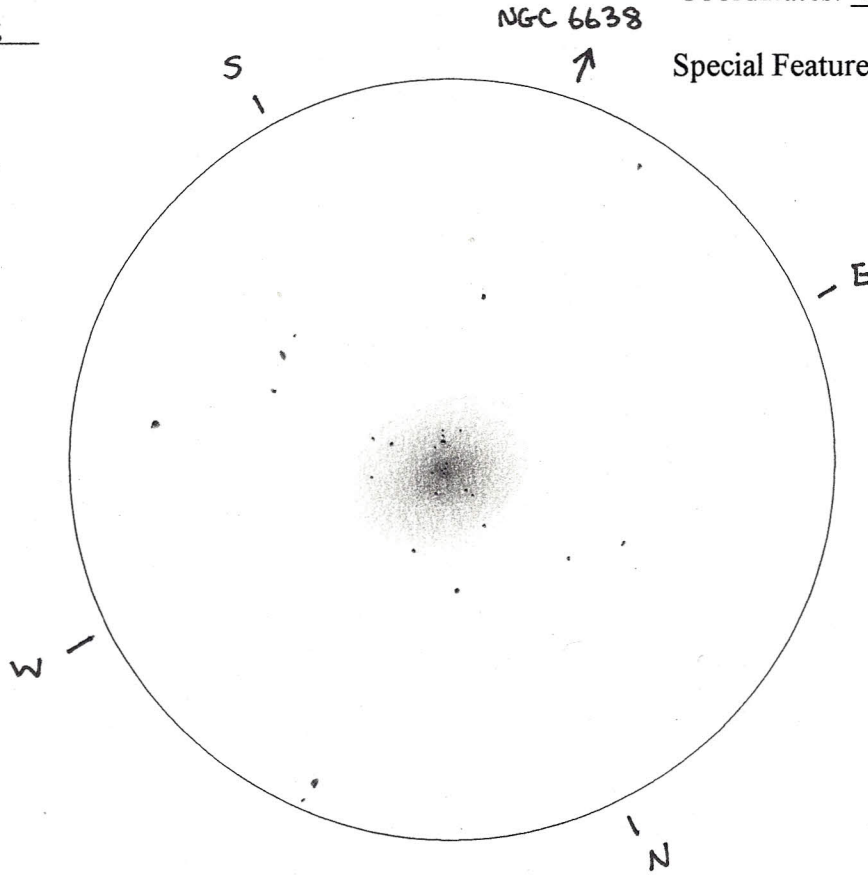

Telescope: 12.5" Dob  
Eyepiece: 12.5mm plössl  
Filter: —  
Magnification: 122x

Type: GC  
Magnitude: 6.9  
Size: 11'

Coordinates: 18h 24.5m -24° 52'

Special Features: Dist: 20,000 l. y.

Discovered by  
Messier, 1764.

Locating  
Sketch:

Sagittarius

Description and Field Notes: A moderately large globular becoming gradually brighter toward the center, with large, not quite starlike core. Several stars resolvable. Spotted 9<sup>th</sup> magnitude NGC 6638, a globular cluster, a little over 1° to the southeast.
