

OBJECT

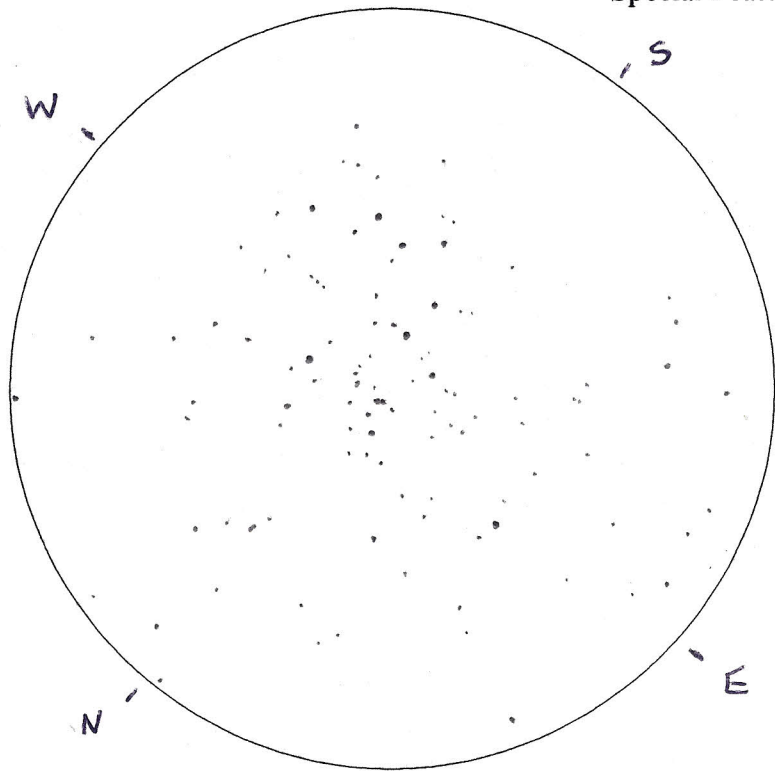

Date: 5/6/99  
Time Started: 9:10 PM CDT  
Time Finished: 9:32 PM CDT  
Transparency: 4.0  
Seeing: 3.0

Common Name: \_\_\_\_\_  
M#: 47  
NGC #: 2422

Telescope: 12.5" Dob  
Eyepiece: 40mm plössl  
Filter: —  
Magnification: 38x

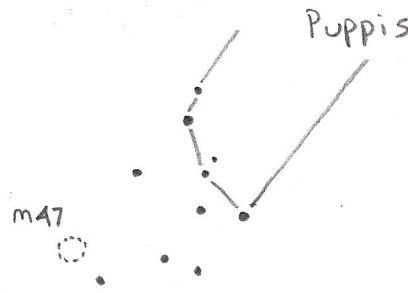

Type: OC  
Magnitude: 4.4  
Size: 30'  
Coordinates: 7h 36.6m -14° 30'

Special Features: About 45 stars  
Mag: 6.000  
Includes double Σ1121  
Distance: ~1540 l.yrs

Σ1121 has 7 1/2" separation

Locating Sketch:

Description and Field Notes: Large, bright cluster. Reminds me of the Pleiades but much smaller and with no nebulosity. A nice double star in the center.
