OBJECT
Common Name: _____
M#: 56
NGC #: 6779

Telescope: 12.5" Dob
Eyepiece: 26mm plossl
Filter: -
Magnification: 60x

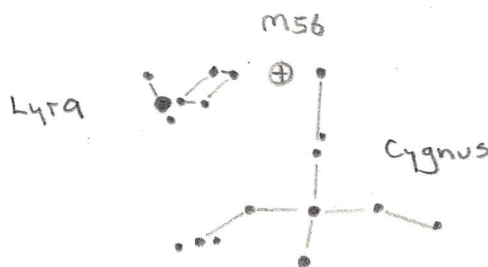

Type: GC
Magnitude: 8.3
Size: 7'
Coordinates: 19h 16.6m 30° 11'

Discovered by
messier on
January 19, 1779.

Special Features: Distance: ~46,000 lt. yrs.
Diameter: ~60 lt. yrs.

Locating
Sketch:

Description and Field Notes: Fairly dim cluster, only partly resolvable into a few dim stars. Not much central condensation. Fairly uniform brightness.
