OBJECT
Common Name: Little Dumbell or Barbell
M#: 76
NGC #: 650

Type: PN
Magnitude: 12.2
Size: 1'
Coordinates: 1h 42m 51.34s

Special Features: Often regarded as the faintest M object.
Listed as two objects in the NGC catalogue (650 & 651).
Distance: ~2000 light yrs.
Irregular, elongated shape.

Locating Sketch:

Description and Field Notes: Extremely faint nebula, small, with maybe a hint of elliptical shape.
