

OBJECT

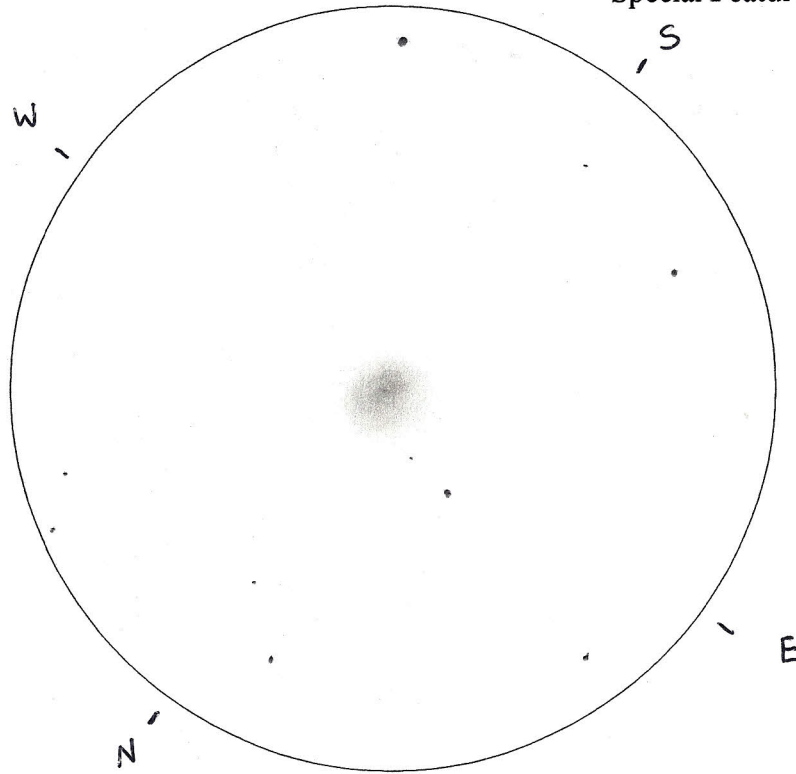

Date: 9/5/99  
Time Started: 8:51 PM CDT  
Time Finished: 9:10 PM CDT  
Transparency: 3.0  
Seeing: 4.0

Common Name: \_\_\_\_\_  
M#: 80  
NGC #: 6093

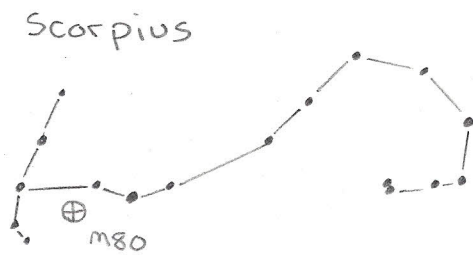

Telescope: 12.5" Dob  
Eyepiece: 12.5 mm Plossl  
Filter: —  
Magnification: 122x

Type: GC  
Magnitude: 7.2  
Size: 9'  
Coordinates: 16h 17.0m -22° 59'

Special Features: Distance: ~36000 H.yrs.  
Diameter: ~50 H.yrs.  
Magnitudes: 14....

Locating Sketch:

Description and Field Notes: Small & fairly faint. Just on the verge of resolution at 240x. Central condensation marked but not quite starlike. Caught in SW just before disappearing behind the tree line.
