

# OBSERVATION RECORD

OBJECT

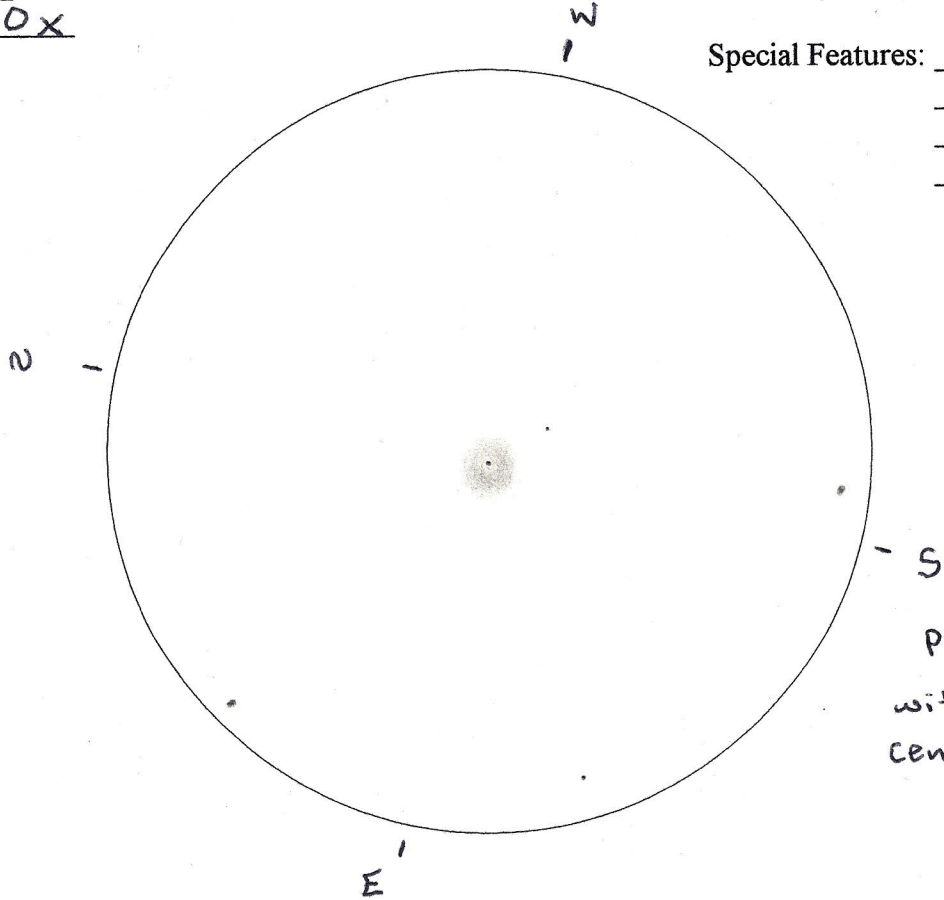

Date: 11/1/02  
Time Started: 9:53 PM CST  
Time Finished: 10:15 PM CST  
Transparency: 5.0  
Seeing: 3.0

Common Name: \_\_\_\_\_  
C#: 2  
NGC #: 40

Telescope: 12.5" Dob  
Eyepiece: 7mm plössl  
Filter: —  
Magnification: 240x

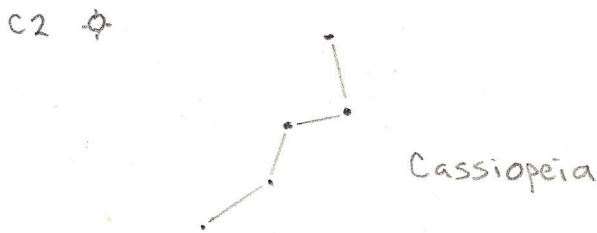

Type: PN  
Magnitude: 10.7  
Size: 1.0' x 0.7'  
Coordinates: 00h 13m 02.4s +72° 31' 40"

Special Features: \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

Planetary Nebula  
with Wolf-Rayet  
Central Star.

Locating  
Sketch:

Description and Field Notes:

Round shape. Large, but not very bright. Central star pretty bright with darker area around it, giving the nebula a doughnut shape. With averted vision, the nebula appears to be mottled.
