

### OBSERVATION RECORD

#### OBJECT

Date: 10/5/02  
 Time Started: 10:40 PM CDT  
 Time Finished: 11:01 PM CDT  
 Transparency: 5  
 Seeing: 4

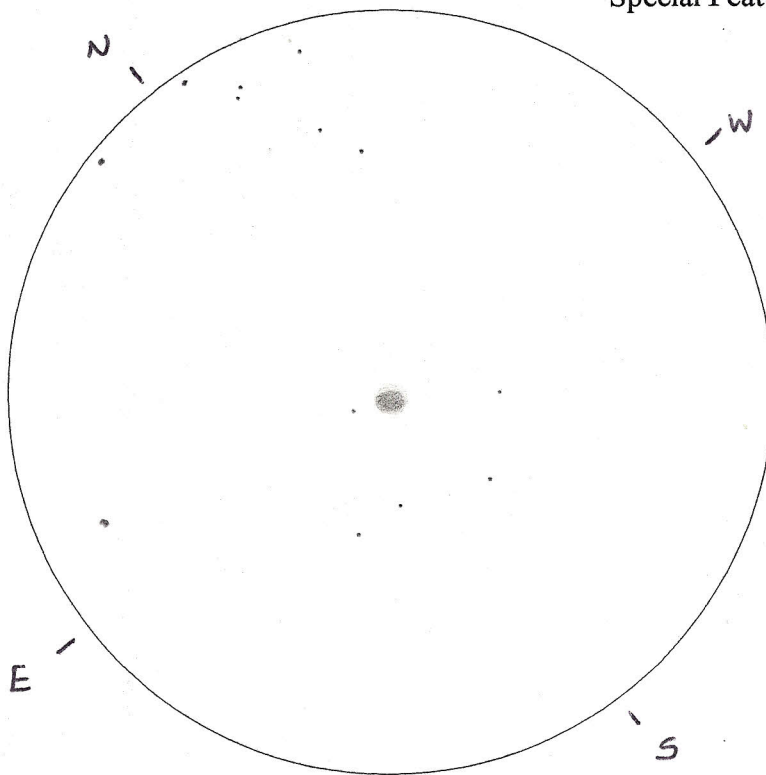

Common Name: Blue Snowball Nebula  
 C#: 22  
 NGC #: 7662

Telescope: 12.5" Dob  
 Eyepiece: 12.5mm p135s1  
 Filter: —  
 Magnification: 122x

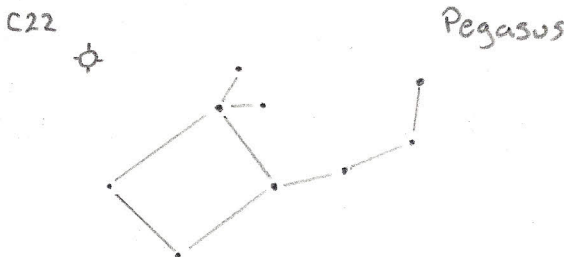

Type: PN  
 Magnitude: 8.6  
 Size: 17.0" x 14.0"

Coordinates: 23h 25m 54.35s +42° 32' 30"

Special Features: Blue color  
Estimates of distance  
range from 1800  
to 5600 lt. yrs.

Locating Sketch:

Description and Field Notes: Small but bright! Not quite perfectly round. A little dimmer to the NW. Shows a large "disk", almost like looking at Neptune as the color is also bluish. Pretty even brightness. Edges fuzzy.
