

### OBSERVATION RECORD

Date: 9/28/02  
Time Started: 9:45 PM CDT  
Time Finished: 10:05 PM CDT  
Transparency: 5.0  
Seeing: 4.0

Telescope: 12.5" Dob  
Eyepiece: 40mm plössl  
Filter: —  
Magnification: 38x

OBJECT  
Common Name: Crescent Nebula  
C#: 27  
NGC #: 6888

Type: Bright Nebula  
Magnitude: 7.5  
Size: 20.0' x 10.0'  
Coordinates: 20h 12m 12.0s +38° 20' 00"

Special Features: Wind blown Wolf-Rayet Ring Nebula  
Emission type  
Dist: ~ 5000 lt. yrs.

Locating Sketch:

Description and Field Notes: Extremely faint nebula, elliptical in shape, but only a couple of segments are bright enough to be visible. Classified as a "wind Blown Wolf-Rayet Ring Nebula". The elliptical shape can be discerned from the shape of the segments.
