

### OBSERVATION RECORD

OBJECT

Date: 3/21/03  
Time Started: 8:10 PM CST  
Time Finished: 8:42 PM CST  
Transparency: 3.0  
Seeing: 2.5

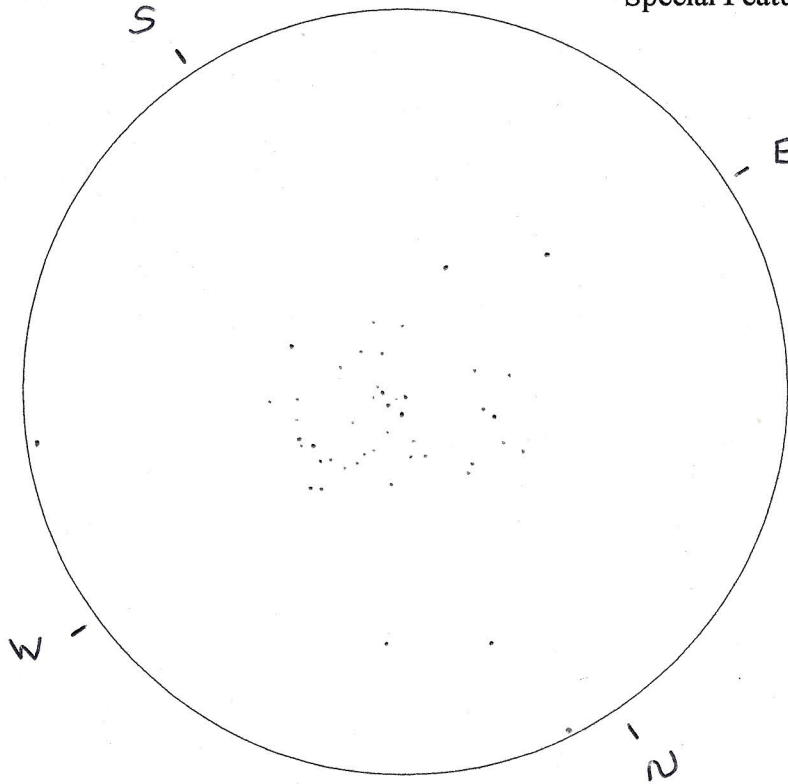

Common Name: \_\_\_\_\_  
C#: 54  
NGC #: 2506

Telescope: 12.5" Dob  
Eyepiece: 12.5 mm plössl  
Filter: —  
Magnification: 122x

Type: OC  
Magnitude: 7.6  
Size: 7.0'

Coordinates: 08h 00m 12.0s -10° 47' 00"

Special Features: No. of stars ~150  
11<sup>th</sup> to 20<sup>th</sup> magnitude  
Age of cluster 2 -  
2.3 billion yrs.

Locating Sketch:

Description and Field Notes: A small but interesting open cluster with a variety of stars. The longer one observes, the more faint stars one sees. Fairly compact.
