

OBSERVATION RECORD

OBJECT

Date: 7/6/02
Time Started: 9:32 PM CDT
Time Finished: 9:55 PM CDT
Transparency: 4.5
Seeing: 3.5

Common Name: _____
C#: 66
NGC #: 5694

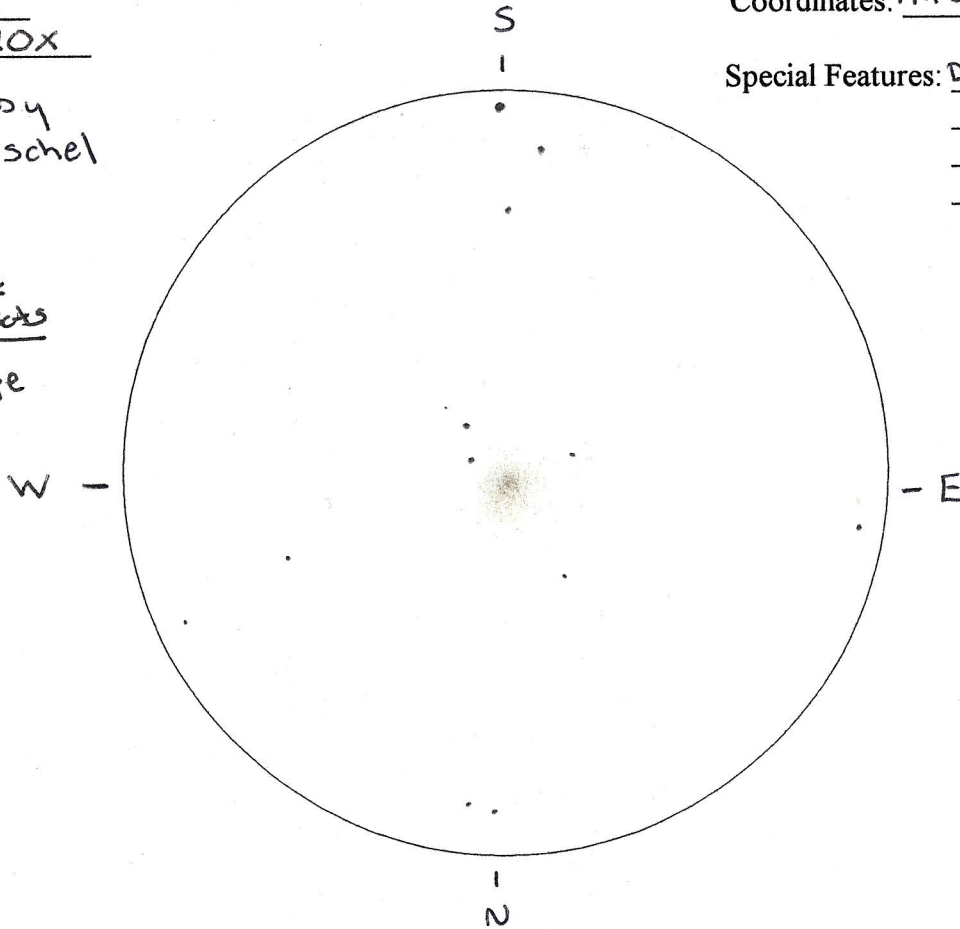

Telescope: 12.5" Dob
Eyepiece: 12.5mm plossl
Filter: —
Magnification: 120X

Type: GC
Magnitude: 10.2
Size: 3.6'
Coordinates: 14h 39m 36.55s -26° 32' 18"

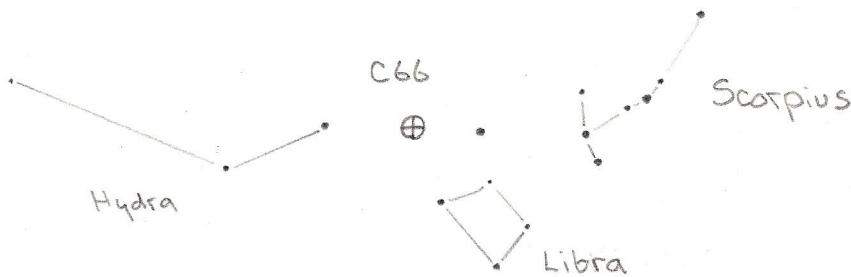

Special Features: Dist. 110,000 lt. yrs.

Discovered by
William Herschel
in 1784.

observing the
Caldwell objects
-David Ratledge

Locating
Sketch:

Description and Field Notes: Fairly small and dim globular. Becoming gradually brighter then suddenly brighter toward the core. Nucleus almost starlike, unresolved at 120x. Still unresolved at 240x. Round.
