Object: NGC 1245 (H25)-6
 Type: OC Mag: 6.9 Size: 10'
 Date: 3/8/05 Time: 2039-2100 CST
 T/S(1-10): 8.5/3.0 Eyepiece/X: 12.5mmP/122x
 Fil: — Tel: 12.5" Dob

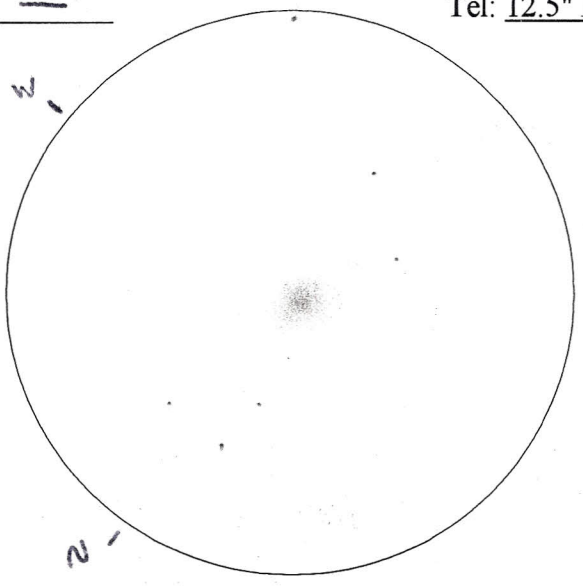

A rich but surprisingly small and dim cluster. One bright star just to the south, another, not so bright, to the east.

Object: NGC 1342 (H88)-8
 Type: OC Mag: 7.1 Size: 15'
 Date: 3/8/05 Time: 2006-2022 CST
 T/S(1-10): 8.5/3.0 Eyepiece/X: 26mmP/59x
 Fil: — Tel: 12.5" Dob

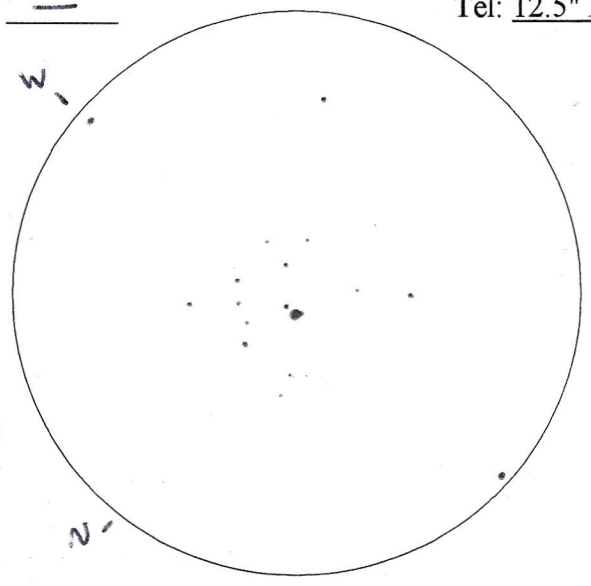

A loose collection of bright & dim stars. About 40 counted. Two bright stars to the NNE side of the cluster. Another, closer bright pair to the WNW.

Object: NGC 1407 (H107)-1
 Type: Gal Mag: 9.7 Size: 6.0' x 5.8'
 Date: 3/8/05 Time: 1930-1940 CST
 T/S(1-10): 8.5/3.0 Eyepiece/X: 12.5mmP/122x
 Fil: — Tel: 12.5" Dob

A faint, round smudge. Dim halo surrounding core becoming gradually brighter toward the center. No nucleus.

Object: NGC 1444 (H80)-8
 Type: OC Mag: 6.4 Size: 4'
 Date: 3/8/05 Time: 2104-2116 CST
 T/S(1-10): 8.5/3.0 Eyepiece/X: 6.3mmP/242x
 Fil: — Tel: 12.5" Dob

This is a cluster? Just a handful of dim stars surrounding the bright double star ϵ 446.
